Title: International Journal of Intelligent Engineering and Systems
ISSN / E-ISSN: / 2185-3118
Publisher: Intelligent Network And Systems Society

Dear Kei Eguchi,

The title mentioned above has been re-evaluated by the Scopus Content Selection & Advisory Board (CSAB) to determine whether the title meets the content selection standards of Scopus today. The re-evaluation of this title is now complete and it was decided to **continue with the indexing of this title in Scopus. No changes will be made to the current content present in Scopus or the forward flow.**

For your information, the reason for making this decision is:

The journal marginally fulfills the criteria for retaining in Scopus. The diversity of editorial board members is not in line with the international scope of the journal, neither the geographical distribution of the authors. The journal may be resubmitted for Scopus evaluation once the embargo period has expired (after 5 years).

Please note that Scopus is monitoring the quality of all journals indexed in the database on an annual basis and therefore this title may be subject to re-evaluation again in the future.

For more information about the Scopus Re-evaluation initiative, please visit the [Scopus information site](#), or [Scopus blog](#).

Please feel free to contact us at re-evaluation@scopus.com in case you have any questions.

Yours sincerely,
The Scopus Team

Notice: Scopus is owned by Elsevier B.V. and Elsevier is solely responsible for the content selection policy of Scopus. In order to come to a decision to continue or discontinue a title for Scopus, Elsevier follows the independent advice from the Scopus Content Selection & Advisory Board (CSAB). However, Elsevier reserves the right to overrule any advice, adjust the selection criteria, or discontinue coverage without prior notice. Continuation of a title does not guarantee that the title will be subjected to re-evaluation in the future. In no event shall Elsevier be liable for any indirect, incidental, special, consequential or punitive damages arising out of, or in connection with, any advice disclosed or any selection decision made.
